

1:

8136 配置文件中的 帧率设置未生效

康等利加上 代码

```
//kangdengli
DECLARE_ATTR(h264_vui_attr,  gm_h264_vui_attr_t);

//kangdengli
h264_vui_attr.param_info.param.timing_info_present_flag = 1;
h264_vui_attr.param_info.param.video_format = 4;
h264_vui_attr.sar_info.sar.sar_width = 1;
h264_vui_attr.sar_info.sar.sar_height = 1;

if(gm_set_attr(enc_object[ch_num],  &h264_vui_attr))
{
    print_log0(err,"failed  when  gm_set_attr(h264_vui_attr)");
    goto  exit_label;
}
```

被我 替换成

gmlib.conf 中

```
[ENCODE_STREAMS]
; CONFIG1 = resolution_keywords/channels/total_fps/ddr_channel, ...
CONFIG1 = 720P/1/25/0,  VGA/1/25/0,  CIF/1/25/0,  QCIF/1/1/0

[ENCODE_CAPTURE]
; CONFIG1 = resolution_keywords/channels/total_fps/ddr_channel, ...
CONFIG1 = 720P/1/25/0,  VGA/1/25/0,  CIF/1/25/0,  QCIF/1/1/0

[ENCODE_SCALER]
; CONFIG1 = resolution  keywords = channels/total_fps/ddr_channel, ...
;CONFIG1 =  CIF/1/30/0

[ENCODE_DIDN]
; CONFIG1 = resolution_keywords/channels/total_fps/ddr_channel, ...
```

CONFIG1 = 720P/1/25/0, VGA/1/25/0, CIF/1/25/0, QCIF/1/1/0
