

在java代码中设置

例如:

```
super.onCreate(savedInstanceState);
```

```
requestWindowFeature(Window.FEATURE_NO_TITLE); //取消标题栏
```

```
getWindow().setFlags(WindowManager.LayoutParams.FLAG_FULLSCREEN, WindowManager.LayoutParams.FLAG_FULLSCREEN)
```

取消手机状态栏

```
setContentView(R.layout.activity_main);
```

在AndroidManifest.xml中设置

在Activity的属性中添加:

```
android:theme="@android:style/Theme.NoTitleBar.Fullscreen" //全屏
```

或

```
android:theme="@android:style/Theme.NoTitleBar" //取消标题栏
```

不过背景会变成黑色
