

```
1: ccm_util.c:2900: error: conflicting types for 'ccm_alert_task_sch'
    ccm_util.c:2894: note: previous implicit declaration of
'ccm_alert_task_sch' was here
```

问题出在调用ccm_alert_task_sch在ccm_alert_task_sch定义之前

```
2: [root@lifiegbpwnv5a@15576@m@u@e.192.168.2.102@w.192.168.188.254]# mount -o
nolock 192.168.2.145:/home/mining/project /mnt/nfs/
```

```
mount: RPC: Unable to receive; errno = Connection refused
```

挂载失败，以前一直好好的突然就没用了，ping也能ping通

经过思考，ip是自己设置的，估计是有ip冲突，所导致的，修改下ip就好了
