## 解决svn "cannot set LC CTYPE locale"的问题

在ubuntu 8.10下安装的svn, 在将Ubuntu的语言修改为英文之后, 出现错误警告:

## \$ svn

svn: warning: cannot set LC\_CTYPE locale

svn: warning: environment variable LANG is en\_US.UTF-8 svn: warning: please check that your locale name is correct

Type 'svn help' for usage.

解决方法很简单,修改/etc/profile:

sudo vi /etc/profile 加入一行: export LC\_ALL=C source /etc/profile

svn就可以正常工作了。
